

## About me

As professional full stack developer, I have a great skill and experience in software development. This skill is from planning the database schema, wireframing the base design, high-level design, to fully backend development. My professional projects could prove this skillsets and experience which could be seen in my portfolio website.

# MUHAMMAD HUSAIN ABOOTALEBI

Full Stack Developer

## Experience

- 2022 - 2024

Cooperation Type: **Remote**  
Destination Country: **Canada**  
Position: **Full Stack Developer**  
Credit: **BitCan Geosciences & Engineering Inc.**

Contract Company: **MaxC**  
Due to my consistent responsibility, I have the opportunity to take on a position in full-stack development at MaxC, focusing on developing Geomechanics software remotely. This cooperation has a positive impact on my experience and skills, helping me further enhance my knowledge.

## Projects

### EShoppify

Name: **EShoppify**  
Category: **E-commerce**  
Devices: **Mobile | Web | PC**

EShoppify, a fully integrated e-commerce platform, highlights my expertise in design and development through features like seamless product browsing, secure payments, and efficient order management, showcasing my commitment to impactful digital solutions. Scan the QR code above to view this project on my website.

### Assisti

Name: **Assisti**  
Category: **Artificial Intelligence**  
Devices: **Mobile | Web | PC**

Assisti is a multidisciplinary project combining UI design, full-stack development, and advanced AI engineering to create intuitive applications. By leveraging cutting-edge AI models and deep learning techniques like CNNs, it sets a benchmark in innovative, AI-driven application development. Scan the QR code above to view this project on my website.

### Devland

Name: **Devland**  
Category: **Social Networking**  
Devices: **Mobile | Web | PC**

Devland is a social application that connects developers with stakeholders, clients, and peers while showcasing their projects and achievements. It enables users to explore detailed project configurations, access live demos, and initiate collaborations, making it a vibrant hub for professional networking and interaction.
